

xml exporter®

Nowadays many printed publications also have alternate electronic channels like Web, SMS, Etc. This requires their information files to be easily used or shared in a compatible format by several systems.

XML is currently a standard format with the necessary features for such a task.

XMLExporter is a script that extracts the articles from SCEnterprise 5.0.x with their respective images and PDFs in XML format, including relevant metadata like publication, section, etc. Also has a feature to send the exported files to the next status in SCEnterprise.

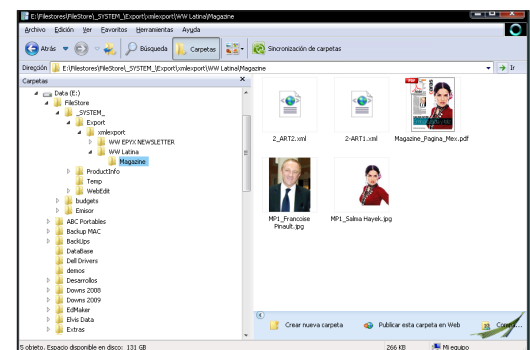

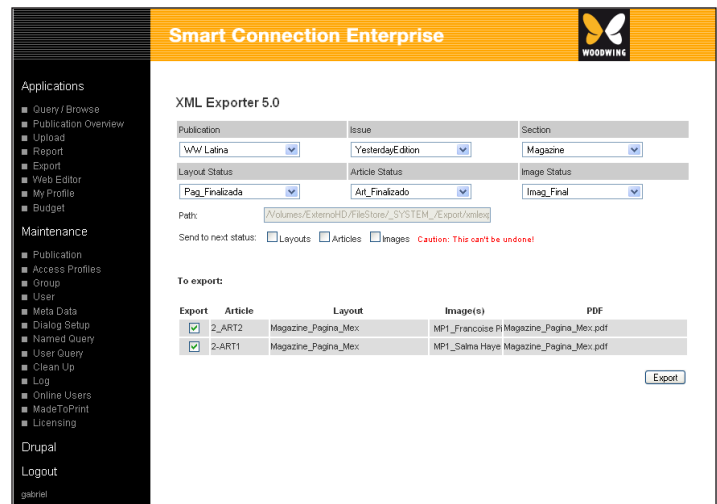

The importance of this script is that besides of exporting the XML, it also gathers the related objects like images and the PDF of the printed page to be used integrally in other media.

Requirements:

- SCEnterprise v5.0.x
- Smart Mover (optional)

Platform:

- Win, Mac, Linux
